

Energy Futures Forum

Seymour • Saturday November 16th 2-5pm
VRI Hall* (between old steam train and bus terminal) • Gold Coin Entry

In transitioning from our dependence on limited fossil fuel reserves to harnessing clean renewable energy - we can lower our impact on the environment and the severity of climate change. Reducing our own energy use will play a major role in our ability to make this transition. We all have a part to play in our *Energy Future*.

Guest speakers from around Victoria will talk about future energy options including solar and wind power, how to reduce energy use, your household bills and the risks associated if we don't move to a renewable energy future. Not to be missed!

The day will be facilitated by BEAM's Phil Bourne with support from Leigh Ewbank of *Yes2Renewables*. **Speakers include:**

Gwenda Allgood - Ararat Councillor, community benefits of wind farm development
David Robinson – L.I.V.E. community solar on the South Melbourne market
Trent Hawkins – Reducing bills and energy use in the household

More speakers to be announced, watch www.beam.org.au for updates. Presented by:

In collaboration with:

* VRI Hall - Victorian Railways Institute Hall is next to Seymour Station, on the bus terminal side.
